

Maggidi Sai

UI/UX Designer & Frontend Developer | 3+ Years

Hyderabad , India | +91 9182029042 | maggidisai4@gmail.com [Linkedin](#) | [Portfolio](#)

Professional Summary

UI/UX Designer & Front-End Developer with 3+ years of experience delivering end-to-end design and development solutions for web and mobile applications. Strong expertise in UX strategy, user research, interaction design, wireframing, prototyping, usability testing, and design systems, along with hands-on experience in Angular and React to build responsive and scalable user interfaces.

Core Skills

Design Leadership: Mentoring, Design Reviews, Feedback, Quality Assurance

UX Strategy: UX Roadmap, Product Alignment, Experience Optimization.

UX Research: User Interviews, Research Planning, Personas, Journey Mapping, Competitive Analysis.

UX Design: Information Architecture, User Flows, Task Flows, Wireframes, Interaction Design.

UI Design: High-Fidelity UI, Responsive UI, Mobile UI, Web UI, Visual Design, Layout Systems.

Design Systems: Design Standards, Component Library, UI Guidelines, Documentation, Consistency.

Testing & Iteration: Usability Testing, Insights, Iteration, Data-Informed Design, UX Improvements.

Accessibility: WCAG, Accessibility Standards, Inclusive Design.

Front-End Development: Angular, React, HTML5, CSS3, JavaScript, Component-Based UI Implementation

Responsive Implementation: Mobile-First, Cross-Browser Support, Pixel-Perfect UI, Layout Alignment, Flexbox, Grid, [UI Debugging](#)

Collaboration: Stakeholder Management, Product Managers, Developers, Presentation and Communication.

Tools: Figma, FigJam, Canva, Photoshop, stitch, Aistudio, claude, VS Code, Github, vercel.

Experience

UI/UX Designer & Frontend Developer | Devlats pvt Ltd – Hyderabad

Jan 2023 – Present

- Designed intuitive web applications, mobile apps, and dashboard interfaces with a strong focus on user experience and business goals.
- Conducted UX research, created wireframes, user flows, and high-fidelity designs for multiple projects across industries.
- Collaborated with US-based clients to deliver UI/UX solutions aligned with user needs and product requirements.
- Converted UI/UX designs into responsive front-end implementations using Angular, React, HTML, CSS, and JavaScript, utilizing AI-assisted tools to enhance productivity and code quality.
- Worked closely with developers to ensure pixel-perfect UI, resolving alignment, responsiveness, and cross-browser issues.
- Performed UI debugging, identified design gaps, and provided clear guidance to development teams for implementation.
- Contributed to design systems and maintained UI consistency across applications
- Designed marketing assets including posters, banners, and other graphical materials
- Developed and optimized static websites with a focus on SEO, performance, and accessibility

Top Projects

Inventory Management System (Web Application)

- Designed user flows, wireframes, and high-fidelity UI using Figma, ensuring consistency with reusable components.
- Developed a multi-level system (Super Admin → Admin → Staff) with features like inventory, billing, GST, and payment tracking.
- Built dashboards for real-time insights on stock, sales, and financial performance with cross-device accessibility.
- Contributed to UI debugging and front-end development, fixing responsiveness and improving overall user experience.

Soult App – Digital Locker & Asset Management (Mobile Application)

- Redesigned the mobile app UI with improved user flows, wireframes, and high-fidelity designs using Figma, enhancing overall user experience.
- Built a secure digital locker concept to store documents and sensitive personal information with a clean, intuitive interface.
- Designed a unique executor access feature, allowing authorized users to access and manage data in case of emergency scenarios.
- Ensured a fully responsive and user-friendly design for Android and iOS platforms, focusing on security, accessibility, and usability.

Foodistan – Food Chain and Delivery Application (Web Application)

- Designed user flows, wireframes, and high-fidelity UI using Figma, ensuring a consistent and scalable design system.
- Developed a fully responsive web application and contributed to front-end development using Angular.
- Implemented store-based product request and distribution features, enabling efficient multi-store operations for an Australia-based client.
- Performed UI debugging and responsiveness fixes, improving usability and cross-device performance.

MedQuants – Pharmacy Delivery & Healthcare App (Mobile Application)

- Designed end-to-end user flows, wireframes, and high-fidelity UI using Figma for a multi-module healthcare platform (User, Rider, Pharmacy, Admin).
- Built features for medicine ordering, prescription upload, order handling, and delivery tracking, along with doctor appointments and lab test booking.
- Solved key UX challenges (like prescription upload flow) by creating intuitive, user-friendly UI solutions in collaboration with developers and stakeholders.
- Designed a modern, scalable interface (glassmorphism style) and worked closely with clients and teams to deliver a seamless, end-to-end experience.
